

Product End Of Life (EOL) Notification

October 5, 2022

Dear Valued Customer,

T-Global Technology Corporation sincerely appreciate your support and use our products (thermal parts) designed in your products in the past years. Since some of our products (see table below) have been released for several years which by using either old materials or old production process, they are now getting difficulty in our production, including the problem of less production efficiency and longer delivery time, etc.

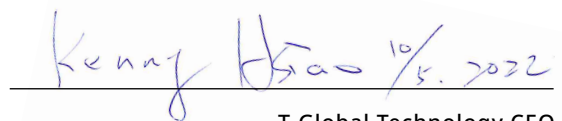

We are difficult to decide the termination and issue this notice. We can understand this termination will cause your inconvenience, but we really hope our recommended replacement (see table below) by latest and advanced parts can shift your product design smoothly and successfully. Based on our observation and experience, these replacement parts can be used and replace old parts directly without any design change.

Table of EOL Parts and Replacement Parts

Item	GT15	GT20	GT30	TG2030	TG4040	TG4040F	TG4040LC	TG6050
